# Virginia Health Resorts.

A Natural Sanitarium Within a Few Hours' Ride of Washington.

### Dr. Joseph Holt,

Who discovered and applied the system known as "MARITIME SANITATION," who ranks among the foremost sanitarists of the world, and who has studied climatic conditions more thoroughly than any other southern physician, in reply to a question regarding the mountain and springs section of Virginia as an outing and health region, wrote as follows, under date of May 31st, 1896:

"I consider the mountains of Virginia as a natural sanitarium where visitors from warm latitudes, and especially from crowded centers, may surely enjoy the benefits of waste-restoring stimulus, which insures a rapid recuperation and the very best preparation for renewed health and a long sustained activity in the occupation of a busy and often overworked life."

The section of country referred to by Dr. Holt is the mineral springs region of the Blue Ridge and Alleghany Mountains-four to seven hours' ride from Washington by the Chesapeake and Ohio Railway, one of the safest, best equipped and most picturesque trunk lines in America

In this favored region, at an average elevation of 2,500 feet, are the Virginia Hot Springs, with the magnificent New Homestead, recently improved and enlarged; the most luxurious and modern bathing establishment in this country (every bath being given from flowing springs of natural hot water), casino, golf links and well kept greens, livery and riding school. The Healing Springs, two and a half miles, and the Warm Sulphur Springs, miles distant, both quiet, picturesque and homelike resorts: the Greenbrier White Sulphur Springs, for generations the central point of reunion for the best society of the north and south; Old Sweet Springs, Sweet Chalybeate Springs, Red Sulphur Springs, Salt Sulphur Springs, Rockbridge Alum Springs, Natural Bridge, Nimrod Hall, many other well-known health and pleasure resorts, and three hundred homes for summer boarders.

Mr. George Earle, who was first assistant postmaster general during Preident Grant's initial administration, is seriously ill at his residence, No. 2109 O street northwest. While there has been no material change in his condition since Saturday night, his advanced age makes recovery doubtful.

His illness, heart failure, with congested Cabin John; pezizas and Geoglussums, found near Eastern branch, and calostomas and clitcybe multiceps, from North Carolungs, at one time threatening pneumonia, is mainly attributable to a sedentary life during the past severe winter, and a too close application to the literary pursuits engaging his attention since retirement from the active practice of law several years ago. He possesses a vitality unusual in a man of seventy-eight, and his robust constitution and indomitable will are additional factors

prominent in the politics of that state in the years immediately following the war.

Nott admitted he had been drinking. He that he was near the trestle, went through, sat in the doorway of a house on D street sustaining a broken leg below the thigh to rest himself and the defendants sat beto rest himself and the defendants sat be-side him. Policeman Riley saw one of them with his hand in the stranger's pocket, and so did a woman living on D street. When the visitor was called upon by the police-man he found that one of his pockets had been cut, but he thought he had not been robbed. He had about \$18 in his pockets when he reached the city and is because tho summoned aid and removed the sufferer to his home on Chestnut avenue, where his injuries were treated by Dr. Stone of Brightwood and Dr. Bennett of Takoma. It is not known just how long Mr. Shreve lay on the tracks of the electric road after failing; but, had a car passed,

when he reached the city, and he knew he had spent some of his money.

Judge Kimball fined the prisoners each \$40, with six months on the farm as the t is more than likely that he would have ween killed. He had failen a distance of wenty feet or more. An informal meeting was he'd yesterday equivalent.
